

Series 900 Hinged Door with Standard Panic Hardware

Build Better

CLASSIC LINE: High-quality moving glass walls and windows that combine exceptional performance with clean design.

Series 900 Hinged Door with Standard Panic Hardware

The Series 900 Hinged Door with Standard Panic Hardware features a large glass panel that maximizes views and lets in natural light, as well as creating an impressive main entrance with the functionality of panic bar egress. Top and bottom rails of the door nest with the stiles to eliminate daylight at the corners. The door is available in single or double out-swing configurations and comes pre-assembled with a standard panic bar, concealed overhead closer, 10" bottom rail, and 1/2" threshold for use in many commercial applications.

ENERGY EFFICIENCY

A .56 U-value for standard low-E, argon-filled dual-pane glass gives the door increased energy efficiency. Glass can be customized in a variety of coatings, tints, and thicknesses for improved privacy, protection, and thermal efficiency. The aluminum frame is thermally broken to reduce heat and cold transfer.

STANDARD FEATURES

The standard package includes Von Duprin 98 Series panic bars with rim (single door) or concealed vertical rod (double door) latching and integrated exterior 7" offset pull handle, Jackson 20330 concealed overhead closer, 10" bottom rail, and 1/2" commercial threshold and continuous hinge.

FINISHES AND COLORS

Finishes are available in-stock or as designer selections, and they can be customized to match nearly any color. Bronze Anodized and Satin Anodized come standard with a Class 1 coating thickness for increased smoothness and durability. Our designer colors include a high-quality paint finish that conforms to a minimum rating of AAMA-2605, currently the highest rating for organic finishes.

PERFORMANCE

Frame Depth	4 1/2"
U-Factor (Per NFRC 100)*	0.56
CR (Per NFRC 500)*	28
CRF Frame (Per AAMA 1503)	49
